

Student and Family Checklist

If Unwell - Stay at Home

- If your son, or someone at home or in your contact circle is sick or unwell, don't take any chances- keep him out of school, notify reception and contact your G.P.
- If your son has a chronic condition that you believe puts him at increased risk, seek medical advice from your GP before he returns to school. Contact our First Aid team at school if you have any specific issues you'd like to discuss.

Have and Wear a Mask

- Those coming on public or private transport need to have and wear a mask. They must be worn in school also when entering and leaving the building.
- Visors have been purchased for all students and staff to be worn during and between classes. They will remain in the school overnight and be cleaned routinely during the school day. These visors are now part of the school uniform and failure to wear the one provided or intentional damage to the visor will be seen as a breach of our Code of Behaviour and dealt with accordingly.

Hand & Environmental Hygiene

- All students should carry personal hand sanitisers.
- However, the school has installed sanitisers throughout the building and in order to protect each other it is vital that we wash our hands thoroughly after using the toilet and sanitise following the use of any shared items.
- Teachers will provide ample opportunities throughout the day for students to sanitise their hands.
- The school will be cleaned daily and antibacterial wipes will be provided for all students and teachers so that they can keep their work space clean at all times.

Physical Distancing

- Students must refrain from close contact with other students; including handshakes/hugging etc.
- The school has been repurposed to facilitate physical distancing in the classrooms and minimal contact and congestion in common areas but ultimately each student must be diligent and proactive to ensure the safety of all.

Cough Etiquette

- Students must use the tissues provided in every classroom when coughing and sneezing. In the absence of a tissue they must cough/sneeze into their elbow, never into open air.

Parents/Guardians should only come to the school by appointment.

Do not arrive at the school without prior notice and approval from management.
Please use email/phone options where possible when engaging with the school office and/or teachers.
