

Agreed report.

A usual board meeting took place on the 7th of February 2022.

The board review the audited accounts for the year ending August 2021. Currently enrolment trends are very strong will all current places in 1st year accepted at this point. The school is currently focusing on improving assessment practice in the school and this will form the strand for SSE in the next academic year. The board welcomes the healthy intake in Transition Year.

Covid is still having an impact on the school with significant numbers of students out. The school is focused on identifying and supporting at risk students. Staffing is still challenging but the school has remained open. Sincere gratitude to all staff who offered to take up additional supervision. This has eased the burden significantly. Information evenings have continued online and these have been well attended. Parent's council continues to meet online. New membership is being encouraged.
